 KHANGAROT  
**Patient Category** : Diya Medicare Foundation

#### Final Diagnosis

ACYANOTIC CONGENITAL HEART DISEASE  
 LARGE SECUNDUM ASD  
 DILATED RA/RV  
 NORMAL VENTRICULAR FUNCTION

#### Presenting Complaints

Ms. ANABIYA 4 years old girl from Rampur, is a known case of Congenitive Acyanotic heart Disease, large Secundum ASD. She was apparently alright till above 1 years back when she was taken to local practioner with complaints of blood in stool, on evaluation she was suspected to have a Congenitive heart disease and subsequently an echo done there revealed large ASD.

She was then advised further management at a cardiac center. She is immunised for age and has no developmental delay.

She has now come to this center for further evaluation and management.
